Addition Problems

Quick Overview
- Basic numbers: 0, 1, 2, 3, 4, 5, 6, 7, 8, 9.
- All other numbers can be written in terms of the basic numbers. Example: 10 is the number after 9. Another example: 37.
- Addition: +. Addition is a way of combining numbers to get another number.
- Example: $3 + 6 = 0$. Another example: $28 + 47 = 75$.
