

# Multiplication Problems

## Quick Overview

- Multiplication:  $\cdot$  or  $\times$ . Multiplication, like addition and subtraction, is a way of combining numbers to get another number.
  - Example:  $2 \cdot 3 = 6$ . Another example:  $12 \cdot 7 = 84$ .
  - Sometimes, people use  $\times$  instead of  $\cdot$ . For instance, they write  $2 \times 3 = 6$  instead of  $2 \cdot 3 = 6$ .
- Think of multiplication as repeated addition.
